

Snakebusters, and the custom made presentation for golf clubs

It had to happen.

Snakebusters now do a snake presentation especially for golfers!

Every year, Melbourne's famous "Snakebusters" removes deadly snakes from golf courses or houses that adjoin them. It's really no surprise as the bushy corners, swamps and lakes all make prime snake habitat.

In this age of public liability and associated risks, more and more golf course managers have been asking for Raymond Hoser and Snakebusters to come back to their golf clubs and do his sought after talks on snakes for them and their members.

After all, no golfer wants to get bitten by a snake!

And yes, the live snake shows are always as hit!

Nothing pulls a crowd like a snake show and so they also are great for dinners and fundraisers as well.

And no snake show pulls a crowd like Raymond Hoser and the Snakebusters team.

We have all the deadly snakes from Melbourne that everyone loves to see, including Blacks, Browns, Tigers, Copperheads, Death Adders, Taipans and so on. We are the best, most experienced handlers in the business, remember we wrote and published the book "*Australian Reptiles and Frogs*" way back in 1989, which is still everyone else's "Bible" on snakes ... and not only that, Snakebusters are the best entertainers.

We handle snakes so that the audience sees snakes like no one else can.

Usually (and unless asked otherwise) we also bring in the big harmless varieties like Carpet Snakes so that the audience can get "Hands on" with large snakes and lizards and cuddle up to them if they want.

We even have a professional photographer to take photos of people with snakes so that they can treasure the experience for ever.

While for agricultural shows and expos we tend to do the famous snakes in a pit set up, for golf clubs we tend to do things differently.

Most of our golf club talks are in the evenings, which is when the club members are not at work and can come with their families.

Typically they are held in the club rooms and Raymond does his presentation from a stage or some other fairly "close up" situation.

Raymond will go through the various kinds, how to tell them apart and all the latest advice in terms of where they live, avoiding them, snakebite and so on.

He'll also bring in the same kinds of snake that you'll see in your particular golf course.

In fact the Snakebusters talk is the one time you'll be able to get up close to these critters in complete safety!

Put another way, nothing beats a Snakebusters show.

In this age of public liability risks, OH and S, and insurance headaches, Snakebusters offer the unique alternative of using "venomoid" snakes if requested to do so and as a trend we'll do this anyway because frankly, no one (including other snake experts) can tell the difference!

By the way, "venomoid snakes" are ones that have had their venom glands surgically removed. The snakes look

and act exactly the same as the "normal ones" and unless you can open the snake's mouth, hold it open, get hold of a magnifying glass and know what to look for, then you'd never know the difference.

But, these snakes are harmless.

Hence, there's ABSOLUTELY NO RISK to the handler or the viewers, which is one reason why it's possible to get up close in complete safety.

This also gets over the hurdle of when a golf club wants to bring in a "deadly snake talk", but doesn't want the "risks". Snakebusters is the only "hands on" snake education outfit in Australia with these snakes and there are many other unique features, services and extras, that make Snakebusters the snake presenters of choice.
